Syncing Instructions

Nintendo Switch – Wired Connection
- Use the provided USB-C cable to connect the controller to a USB port on the Nintendo Switch dock.
- The LED indicator light corresponding to the controller player number will remain solid once connected.

Android – Wireless Gamepad Connection
- Press the X + HOME buttons simultaneously for 3 seconds to enter pairing mode. The second and third LED indicator lights will flash in pairing mode.
- Search for the Bluetooth device "Gamepad" under Bluetooth devices.
- The second and third LED indicator light will remain solid once connected.

IOS – Wireless Connection
- Press the Y + HOME buttons simultaneously for 3 seconds to enter pairing mode. The first and fourth LED indicator lights will flash in pairing mode.
- Search for the Bluetooth device "DUALSHOCK 4" under Bluetooth devices.
- The first and fourth LED indicator light will remain solid once connected.

### Android – Wireless Customisation Connection
- Press the "+" + HOME buttons simultaneously for 3 seconds to enter pairing mode. The third and fourth LED indicator lights will flash in pairing mode.
- Search for the Bluetooth device "QMacro" under Bluetooth devices.
- Download the "QMacro" software app and open, allowing the floating overlay option.
- Enter the selected game, and once running, open the "QMacro" software and select game training mode.
- When setting buttons, press the selected button first and the corresponding button in the software will display. Drag the button to the desired position on screen to set the customisation.
- The floating icons call out the key settings, and carry out the functions of each key as determined by your preferences. Once your customisation is completed, click "Save" & "Close."

Laptop – Wireless Connection
- Press the A + HOME buttons simultaneously for 3 seconds to enter pairing mode. The second and third LED indicator lights will flash in pairing mode.
- Search for the Bluetooth device "Gamepad" under Bluetooth devices.
- The second and third LED indicator light will remain solid once connected.

Syncing Instructions

PC — Wired Connection
- Use the provided USB-C cable to connect the controller to a USB port on the PC.
- The default mode is X-INPUT. The first LED indicator light will remain solid once connected.
- To change to D-INPUT, hold the "-" & "+" buttons simultaneously for 5 seconds. The second and third LED indicator lights will remain solid in D-INPUT mode.

PS3 & Smart TV — Wired Connection
- Use the provided USB-C cable to connect the controller to a USB port on the PS3 or Smart TV.
- The LED indicator light corresponding to the controller player number will remain solid once connected.

Turbo Function

- The following buttons are supported for Turbo functionality; **A, B, X, Y, R, ZR, L & ZL**

Setting Turbo
- Hold down the supported button you wish to activate Turbo on, and briefly press the Turbo button once to activate semi-automatic Turbo (burst fire when selected button is pressed).
- Repeating this step again will activate fully-automatic Turbo on the supported selected button. This means pressing the selected button will continue to fire until released.
- Repeating this step a third time will clear Turbo functionality from the selected button.

Clearing All Turbo
- Press and hold the DOWN ARROW button and the "-" (MINUS) button simultaneously. The controller will vibrate to indicate all Turbo functionality has been cleared.

Turbo Speed Adjustment
- Low Speed: 5 Bursts Per Second.
- Medium Speed: 10 Bursts Per Second.
- High Speed: 20 Bursts Per Second.
- Default Turbo speed is Medium Speed.
- To adjust up, press Turbo & the Up Directional buttons simultaneously until the controller vibrates.
- To adjust down, press Turbo & the Down Directional buttons simultaneously until the controller vibrates.

INSTRUCTIONS

## Motor Vibration Adjustment

- To turn off controller vibration, please select this option in System Settings;

    HOME Menu > System Settings > Controllers & Sensors > Controller Vibration

- There are 3 vibration intensity settings — Weak, Medium, Strong.
- To adjust controller vibration, press and hold the Z, ZL, R & ZR buttons simultaneously until the controller vibrates. Each adjustment will cycle through the 3 available intensity modes.

Charging, Power On & Power Off

- When the controller is low on charge, the LED lights will flash quickly.
- Plug the provided USB-C cable into an available USB port and the controller.
- When charging, the LED lights will flash slowly.
- When fully charged, the LED light will remain on.
- Holding the HOME button for 5 seconds will power the controller off.
- To power on, press the HOME button.
- To reset, carefully insert a thin object such as a paperclip into the RESET button on the back of the controller.
