SWITCH PRO GRIP CONTROLLER

INSTRUCTIONS

How to Connect

1. Start up the Switch console.
Enter "System Settings". Select "Controllers and Sensors". Ensure the "Pro Controller Wired Communication" setting is turned On.

2. Remove the Joy-Cons from your console.
3. Position the console with the USB Type-C port downwards. Line up the Switch tracks with the tracks on the Grip and carefully slide the console into the Pro Grip Controller until it snugly clicks into the USB Type-C charging plug.

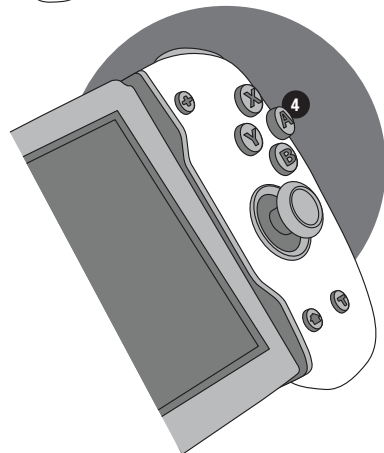

- a. Be careful not to touch the joysticks or any other buttons when plugging in the console.

4. With the console on, Press A on the Pro Grip Controller and it will connect.

5. To finalise setup, we recommend you calibrate the Control Sticks (joysticks) and Motion controls. These settings can be found under "Controllers and Sensors" in "System Settings".

6. To remove, gently use two hands to push the bottom corners of the console upwards, then slide the console away from the Grip.
